NOTE.

A CATALOGUE, containing six plates, printed in metallic colors of silver and gold, illustrating the most interesting and valuable coins in this sale in the highest style of the photographic art, will be sent to purchasers ordering them as soon as they can be got ready.

Printed on heavy tinted paper, and neatly priced in red ink. These catalogues are strictly limited to the number of orders received, and will be sold only by order at this time, and will not be supplied in the regular series of my catalogues.

Price of the illustrated and priced catalogue will be $2.00 each, not subject to any discount.

Correspondents are requested to send early orders, thus giving me time to enter them in my books before I leave for New York. It is not an uncommon thing for me to have a greater number of orders than there are lots in the catalogue and many often arrive too late. Writing as I do, with difficulty, it is very desirable that those who wish to entrust their orders to me, should send them as early as possible, that they may receive proper attention. Address as below; but late orders may be sent to me at New York, care of the auctioneers.

The coin dealers of New York, Baltimore, Philadelphia and Lancaster, Pa., will also receive and faithfully execute bids that may be placed with them. As many inquiries are sent me asking for catalogues to complete files, I have prepared a printed list of those that can be supplied, neatly priced in ink, to the 101st inclusive, which will be sold at prices named. This list will be sent on application.

PATTERN COINS OF THE UNITED STATES.

Among the following will be found a number of *unique* or *excessively rare* PATTERN DOLLARS, struck in silver and copper, which have never before, and probably cannot again be offered at public auction. Several were once in the Mint Cabinet at Philadelphia, and were obtained in legitimate exchange for rare coins of earlier issues, which the cabinet lacked; others, notably the unique set of Centennial Dollars, the 1877 Dollars, the 1879 and 1880 Metric and Goloid Dollars, though issued by the Philadelphia Mint, are not even found in the Mint Cabinet itself. It can indeed be safely predicted that a recurrence of the sale of such an extraordinary array of rarities and unique coins is not within the possibilities of a near or remote future. Collectors wishing to secure one or more of these gems for their collections, will therefore do well to scrutinize the following pages with care, to procure one of the PLATE CATALOGUES, where many are illustrated, and to put themselves in immediate communication with their purchasing agents, or better still, attend the sale in person. To those who collect PATTERN COINS only in their true metal, Nos. 1435, 1436, 1437, 1438, 1439, 1440, 1441, 1443, 1444, 1446, 1450, 1452, 1454 and 1456 are particularly recommended. They are of original, artistic and striking designs, either unique or of excessive rarity, struck in silver or goloid, and in brilliant proof condition, uniting the four qualities most prized by our best collectors.
